

# Virtualization and Cloud Computing for Business Critical Systems

House of Brick is the recognized industry leader in the virtualization of business critical systems. Having consulted with dozens of the Fortune 500 companies, as well as many SMB enterprises, House of Brick has the experience and expertise to make the virtualization of your business critical applications and systems successful. House of Brick provides an array of consulting services focused on virtualization technologies.

## Supported Technologies

We have expertise in many system areas, including:

- Oracle databases
- Oracle E-Business Suite applications
- MS SQL Server databases
- Third-party or common middle-tier platforms for custom developed applications
- Windows & Linux (RHEL, SLES, OEL)
- RISC Unix (AIX, HP-UX, Solaris)

## Managed Consulting Services

Our services include:

- Automated Network, Server, database, and application Monitoring
- Web-based case management and issue escalation
- 24x7x365 response
- Project-based approach to planning and meeting customer needs
- Dedicated account manager
- Remote Administration
- Virtual Application and DR Hosting

## Consulting

Our services include:

- System re-platforming and data migration
- Oracle and MS SQL Server license review and license optimization strategies
- IT transformation advisory services
- Organizational transformation, and hands-on mentoring
- Architecture for virtual and cloud-based environments
- Data Architecture
- High Availability and disaster recovery

# expert SERVICES

The professionals at House of Brick are on top of the latest developments in hardware, software applications, networking and data security. We can provide comprehensive consulting services and act as mentors to your IT staff, or we can take on the daily operations through our Managed Consulting Services program. Whether your needs are immediate and temporary or forward-thinking and long-term, the House of Brick team stands ready to provide the Business Continuity and Disaster Recovery services essential to keep your business running.

*"Over the past several years, I have been involved with numerous consultants engaged to assist Indiana University with various IT issues and projects. In my estimation, the recent engagement with House of Brick has been the most successful in terms of actually achieving results, and making concrete recommendations that make sense and prove their merit in our environment."*

*Michael Egolf  
Indiana University*

## 8 Reasons to Virtualize Business Critical Systems

- |  |  |
|--|--|
| 1 - Cost Reduction                             | 5 - Product Development Process Optimization |
| 2 - Optimize Licenses                          | 6 - Test/QA Process Improvement              |
| 3 - High Availability (HA)                     | 7 - Deployment Flexibility                   |
| 4 - Near 100% Reliable Disaster Recoverability | 8 - Security Considerations                  |
