

Announcing New Tools - Establishing Our Leadership Position for Oracle in the Cloud

by Nathan Biggs ([@nathanbiggs](#)), CEO

...Now, virtualizing Oracle and SQL Server-based applications has become mainstream, and standard practice for most organizations. While continuing to maintain our leadership position in this space, it is now time for us to look forward to the cloud. We are excited that House of Brick is again establishing a leadership position for our customers wanting to consider a public cloud extension to their on-premises virtualization strategy.

House of Brick has been actively working with our partners at AWS and VMware to develop important tools for our customers to plan and design their cloud strategies. Starting today, these tools will be released over the coming weeks and months.

New White Paper

Migrating Critical Oracle Workloads to the Cloud Using VMware Cloud on AWS

by Michael Stone, CIO & Lead Architect
Nick Walter, Principal Architect

In this white paper, House of Brick architects examine the VMware Cloud on AWS offering with the explicit goal of validating complex Oracle RAC setups such as those seen in clients' business critical production environments. The results of testing are shared as well as House of Brick's conclusions, impressions, and recommendations.

Effects of the Values of 'Setall' vs. 'None' on the Oracle Initialization Parameter filesystemio_options

by Andy Kerber ([@dbabaker](#)), Senior Consultant

In this blog I will examine the effects 'setall' and 'none' on the Oracle initialization parameter filesystemio_options. This setting is used to set I/O parameters for the Oracle database when the data files are stored on file system rather than ASM.

Who will win the cloud? CEOs offer wildly differing picks...

Amazon is a pioneer in cloud computing, and the current market leader, but not the tech titan with the greatest future opportunity, according to a panel of technology CEOs who spoke Wednesday at the GeekWire Cloud Tech Summit in Bellevue, Wash.
