

With our Oracle Licensing on AWS – Same Day Consult offer, we work with you to provide a quick and easy approach to understanding Oracle licensing considerations relative to AWS deployment options.

### ORACLE LICENSING - SAME DAY CONSULT

The Oracle Licensing on AWS - Same Day Consult offers organizations a quick and easy approach to understanding Oracle licensing considerations relative to AWS deployment options. This short consultation focuses on a single, selected topic from a provided list of the most common concerns when running Oracle on AWS. The high level Oracle on AWS recommendations provided offer simple next steps for moving forward in a cost optimal and audit defensible manner.

The Same Day Consult includes the following sessions:

- **Introductory Session** - overview of consult objectives, Oracle licensing and selected topic
- **Consulting Session** – focused review, discussion and Q&A of selected topic
- **Summary Session** – consult wrap-up and mutual observations

### TOPICS AVAILABLE

#### 1. Unlimited License Amendment (ULA) Usage in AWS

Explore options for using an Oracle Unlimited License Amendment (ULA) in AWS.

Topics include: ULA terms, ULA certification, and covered versus non-covered products in the ULA.

#### 2. Oracle Cloud Policy Licensing

Discuss ways to migrate existing processor or Named User Plus licenses to Amazon RDS or EC2.

Topics include: Oracle's cloud licensing rules, licensing considerations during migration, and excluded products.

#### 3. Proprietary Hosting Licensing

Explore the intricacies of hosting SaaS solutions based on Oracle databases in AWS.

Topics include: application architecture, Oracle product licensing, and proprietary application hosting rights.

#### 4. Database Cost Anticipation

Enterprises moving existing Oracle database solutions to AWS often need to know how to calculate the costs of the migrated platform.

This same-day consultation focuses on best practice methods for modeling both AWS resource and Oracle licensing costs.

#### 5. Oracle Audit Overview

Oracle customers often feel nervous about the prospect of being audited by Oracle.

This workshop gives a high-level overview of the audit process and discusses House of Brick best practices for being fully prepared and compliant.

#### 6. Alternative Database Services

One of the best ways to save on expensive Oracle licensing costs is to move suitable workloads out of Oracle databases and into open source engines.

This same-day consultation focuses on the tools and options enterprises can use to migrate off of an Oracle database.

#### 7. Efficient Database Migrations

Cloud migrations can be challenging for Oracle database workloads, so this workshop explores options for migrating in a manner that is both technically efficient and license compliant.
